

NU-VISTA 800

„Huge and room-filling sound!“

Its sound is huge, room-filling, grand rather than grandiose, persuasive rather than commanding. Using a wine analogy, this would be to most 'mega-amps' what Ornellaia is to Amarone. Those lucky enough to savour early Nu-Vista models will know what's in store: the speed and punch of solid-state, with the 'love' you only get from valves. This is a stupendously powerful integrated with impeccable behaviour.

Sound Quality: 88%
