

NU-VISTA VINYL

„The sound agrees with Musical Fidelity!“

Musical Fidelity's Nu-Vista Vinyl shines with its absolute calm and authority as well as with uncompromising dynamics. It improves intelligibility on all lead lines and places percussive bass accents with incredible certainty. Everything sounds authentic and organic at the same time. Though the sound is really immersive, I have got the impression of attending an intimate studio mixing session – so uncoloured and neutral plays the Nu-Vista Vinyl.
