

## M2si

„It's a superb all-rounder and one of the best amplifiers we've heard below the grand mark.“

### Sound:

It delivers a large-scale sound, one that's packed with authority and substance. Listening to Orff's Carmina Burana we're aware of the M2si's refinement and ability to deal with musical complexity without sounding stressed. It can track individual instrumental strands with ease yet never lose sight of the whole. That's a rare talent at this level.

### Our Verdict:

The M2si doesn't have the features list of most rivals but counters with an impressively refined and entertaining performance.

### Best stereo amplifier 2019!
