

## V90-LPS

„Dress to impress!“

The new Musical Fidelity V-90 LPS is a very impressive little product at the price, then. It's way less than most `serious' vinylistas would spend on a phono stage, yet its performance doesn't fall far short of several £500 designs. This makes it cracking value, and its choice of MM and MC inputs allied to neat styling and fine build make it all the more desirable at its low price.
